

Mostafa Omar Abdul-Tawab

Network Security Engineer | SOC Analyst L1

mostafa.omar.cs@outlook.com | +201105699467 | Giza, Egypt | [linkedin.com/in/mostafa-omar-62ba94299](https://www.linkedin.com/in/mostafa-omar-62ba94299)

Profile

Entry-level Network Security Engineer and aspiring SOC Analyst with hands-on experience in security monitoring, incident response, firewall basics, VPN configuration, and network troubleshooting. Currently working as an IT Support Engineer supporting 300+ users, with experience in Active Directory, FortiGate Firewall, Kaspersky Endpoint Security, SIEM tools (Splunk, QRadar, ELK), and SOC lab environments.

Experience

- IT Support Engineer, Canal Sugar**04/2026 – Present | Egypt
- Provided technical support for more than 300 enterprise users across Windows environments.
 - Administered Active Directory users, groups, permissions, and access management.
 - Monitored and troubleshot LAN/WAN, DNS, DHCP, TCP/IP, and Wi-Fi connectivity issues.
 - Configured and maintained FortiGate firewall policies, NAT, VPN, and security rules.
 - Supported network monitoring activities through Zabbix.
 - Assisted in network device configuration, IP addressing, and connectivity troubleshooting.
 - Collaborated with infrastructure and network teams to maintain network availability and performance.

Education

- Bachelor of Communication, Faculty of Engineering, Minya University**09/2020 – 07/2025
- Very Good Grade.

Technical Skills

Firewall Administration Hands-on configuration, policy definition, and log management across Palo Alto Networks, FortiGate, and FortiAnalyzer.	SIEM & Log Management Centralized log analysis, alert monitoring, and event correlation using Splunk Enterprise, IBM QRadar, and ELK Stack.
Web Application & Traffic Management Implementation and troubleshooting of F5 BIG-IP LTM (load balancing, health monitors, SSL offloading, persistence) and F5 Advanced WAF (attack signatures, HTTP/HTTPS security, data theft protection).	Incident Detection & Response Threat detection, Incident analysis, initial triage, incident escalation, tracking IOCs across the MITRE ATT&CK framework., containment support, incident documentation, playbooks
Secure Remote Access Engineering and troubleshooting Site-to-Site and Remote Access solutions (IPsec VPN, SSL VPN via FortiClient).	Scripting & Automation Basic Python for log parsing, task automation, and security data analysis
Core Network Services Administration and troubleshooting of enterprise network protocols including TCP/IP, DNS, DHCP, and NAT.	Endpoint Detection & Response (EDR) Monitoring, threat isolation, and antivirus policy enforcement using Kaspersky EDR.
Operating Systems Proficient administration of Windows and Linux environments.	Layer 2 / Layer 3 Switching Advanced configuration of VLANs, Inter-VLAN routing, Spanning Tree Protocol (STP), and EtherChannel across Cisco environments.
Ticketing & Documentation Incident tracking,reporting, documentation, and case management processes	

Projects

Machine Learning-Based IDS for SDN, *Graduation Project*

Graduation project (Excellent grade): Designed and implemented a machine learning-based hybrid IDS for Software-Defined Networking (SDN), validated through simulation and real hardware deployment, with an interactive dashboard to visualize and detect network attacks.

SOC Home Lab, *Virtualized Environment*

Developed a SOC home lab for Detection and Monitoring training with Windows Active Directory, Windows clients, Ubuntu server, Splunk Enterprise SIEM, Sysmon, and log forwarders to practice threat detection, log analysis, and incident response against simulated attacks using Kali Linux.

Courses

CCNA 200-301 & Network+, *Self-study*

Network Security and cyber operation, *NTI*

Security+ SY0-601, *Netriders*

SEC-450-GSOC Prep, *Netriders*

eCIR, *Netriders*

eJPTv1, *Netriders*

SOC Analyst L1 Learning Path, *TryHackMe*

FortiGate and Palo Alto Firewall, *Self-study*

FortiAnalyzer, *Self-study*

F5 Local Traffic Manager (LTM), *Self-study*

F5 Advanced WAF (ASM) fundamentals, *Self-study*

Soft Skills

- Strong analytical and problem-solving skills
- Ability to follow procedures and meet deadlines
- Effective communication and interpersonal skills
- Passion for cybersecurity and continuous learning
- Teamwork and collaboration
